COMPACT SPRAY UNIT ADVANCED LINE

jerko
Sprühsysteme

INEXPENSIVE AND SIMPLE

This is what we offer

Mobile, compact and versatile.
Manual spray system or compact solution for tests. The compact pressure containers with a usable volume of up to 18 litres are suited for all tasks.

Since handling is particularly easy, these containers are a popular starter solution.

With its well established components, the spray device is perfect for continuous use.

With a self-developed circulation system, the pressure containers are also suitable for spraying lubricants or coatings for ingot casting with solid content.

For easy transport, the sprayers of the Advanced Line are equipped with a mobile chassis.

The advantages — an overview

- Compact, mobile and manoeuvrable
- Easy to operate
- Easy to clean
- Robust technology
- Circulation
- Inexpensive
- 100 % stainless steel
- Designed and built according to Machinery Directive 2006/42/EC

Advanced 9

Usable volume:	9 litres
Pressure:	6 bar
Features:	Mobile chassis Pressure regulator for atomizing air Pressure regulator for lubrication Jerko Basic HSL-1 450 mm Hose package 3 m
Connection:	quick couplings

Advanced 18

Usable volume:	18 litres
Pressure:	6 bar
Features:	Mobile chassis Pressure regulator for atomizing air Pressure regulator for lubrication Jerko Basic HSL-1 450 mm Hose package 3 m
Connection:	quick couplings

Advanced 18C

Usable volume:	18 litres
Pressure:	6 bar
Features:	Mobile chassis Circulation Pressure regulator for atomizing air Pressure regulator for lubrication Jerko Basic HSL-1 450 mm Hose package 3 m
Connection:	quick couplings
